GIRLS' GLOBAL INITIATIVE (GGI)

2026 PROGRAMME REPORT

PAGES OF HOPE: RURAL GIRLS' EDUCATION

Reporting Period: March 2026

Geographical Focus:

Selected rural and underserved communities in the Western North Region of Ghana

Schools Visited: 10

Girls Reached: Approximately 150

Core Activities:

School Engagement and a Community Engagement with Parents in Tekyikrom

1. **EXECUTIVE SUMMARY**

Girls' Global Initiative (GGI) implemented its 2026 Pages of Hope: Rural Girls' Education project as part of its commitment to improving educational opportunities, strengthening the well-being of girls, and drawing attention to the barriers faced by girls living in rural and underserved communities.

During the reporting period, GGI visited 10 schools and directly engaged approximately 150 girls. The schools were located within the communities of Nyankamam, Tekyikrom, Tekyiman, Yaakasi and Enchi. The school engagements created an opportunity for GGI to interact with girls, listen to their experiences, understand challenges affecting their education, and identify areas requiring further support.

In addition to the school engagements, GGI conducted a community engagement specifically in Tekyikrom, where parents were gathered and engaged on issues affecting the education and well-being of girls. This community engagement was intended to recognize the important role parents and caregivers play in supporting girls to remain in school and pursue their educational aspirations.

The engagements identified a number of interconnected challenges, including lack of educational materials, household poverty, tattered school uniforms, inadequate parental care and support, inadequate toilet facilities, lack of potable water in schools, inadequate teachers, and feeding-related challenges.

The findings reinforce GGI's view that improving girls' education requires more than encouraging girls to attend school. Girls need an enabling environment in which they have access to basic learning resources, supportive families, safe and appropriate school facilities, adequate teaching support, food, water and sanitation.

The Pages of Hope project has therefore provided GGI with valuable community-level information that can guide future programmes, advocacy, partnerships and fundraising efforts focused specifically on girls' education and well-being.

2. **BACKGROUND**

Girls' Global Initiative (GGI) is committed to supporting girls, particularly those living in rural, remote and underserved communities. GGI recognises that the ability of a girl to access, participate in and benefit from education can be influenced by conditions within her school, household and wider community.

The Pages of Hope: Rural Girls' Education project was developed to bring GGI closer to girls in underserved communities and to better understand the realities surrounding their education. The project placed girls at the centre of the engagement by creating opportunities to listen to their experiences and identify barriers that affect their learning, participation and well-being.

The project also recognized that parents have an important role in supporting girls' education. For this reason, GGI conducted a specific community engagement in Tekyikrom, bringing parents together to discuss concerns affecting girls and the importance of parental support.

3. **PROJECT THEME**

Pages of Hope: Rural Girls' Education

The theme Pages of Hope reflects GGI's belief that education can open pathways to opportunity, confidence, leadership and a better future for girls. The project focuses on ensuring that girls in rural and underserved communities are not left behind because of the circumstances in which they live.

The project recognizes that educational access is not simply about having a school in a community. Girls need the resources, encouragement, protection and basic conditions necessary to remain engaged in school and learn effectively.

4. **PROJECT OBJECTIVES**

- To engage directly with girls in rural and underserved schools.
- To listen to girls and understand challenges affecting their education and well-being.
- To identify educational, household and school-environment barriers affecting girls.
- To engage parents in Tekyikrom on the importance of supporting girls' education.
- To identify areas where GGI and potential partners can provide meaningful support.
- To generate information that can inform future programmes, advocacy activities and funding proposals focused on girls.

5. **COMMUNITIES REACHED**

GGI's school engagements covered five communities: Nyankamam, Tekyikrom, Tekyiman, Yaakasi and Enchi. The communities provided the geographical setting for the school visits and the identification of challenges affecting girls' educational experiences.

The project also included a specific community engagement in Tekyikrom, where parents were brought together and engaged on issues relating to girls' education and well-being. No equivalent parentgathering community engagement was conducted in the other communities during this reporting period.

6. **SCHOOLS VISITED**

No.	School	Community
1	Nyankamam M/A	Nyankamam
2	Takyikrom M/A	Tekyikrom
3	Yaakasi Roman Catholic Basic School	Yaakasi
4	Takyiman M/A	Tekyiman
5	Yaakasi M/A Junior High School	Yaakasi
6	Presby Junior High School	Enchi
7	Enchico Junior High School	Enchi
8	Wisdom International School	Enchi

9	Nana Brentu Senior High School	Enchi
10	Roselyn Junior High School	Nyankamam

Total schools visited: 10

Total girls reached: Approximately 150

7. **ACTIVITIES UNDERTAKEN**

7.1 School Engagement

GGI conducted school visits across the 10 identified schools and engaged directly with girls. The school engagements provided an opportunity to listen to girls, understand their educational experiences, identify challenges affecting their participation in school, and discuss issues relevant to their continued education and well-being.

- Direct interaction with girls in the participating schools.
- Listening to girls' experiences and concerns.
- Identification of barriers affecting girls' education.
- Engagement with school communities around girls' educational needs.
- Identification of areas requiring future support and intervention.

7.2 Community Engagement in Tekyikrom

As part of the project, GGI conducted a community engagement in Tekyikrom where parents were gathered and engaged on issues affecting girls' education and well-being. The engagement recognized that parents and caregivers can significantly influence a girl's ability to remain in school, access basic learning resources and receive the encouragement and support needed to pursue her education.

The Tekyikrom engagement also provided an opportunity to connect concerns observed at school level with the household realities affecting girls. GGI therefore considers parental engagement an important

component of future interventions, while maintaining girls as the primary focus of the organization's work.

8. KEY FINDINGS AND CHALLENGES IDENTIFIED

8.1 Lack of Educational Materials

A major challenge identified was inadequate access to educational materials. Girls who lack exercise books, writing materials, textbooks and other learning resources may experience difficulties participating fully in school activities. This challenge can be particularly significant where families have limited financial resources.

8.2 Household Poverty

Household poverty emerged as an important factor affecting girls' educational experiences and wellbeing. Where families struggle to meet basic needs, school-related requirements may become difficult to provide. This can affect girls' access to learning materials, uniforms, food and other necessities.

8.3 Tattered School Uniforms

GGI identified concerns relating to worn or tattered school uniforms. For girls from financially vulnerable households, replacing a school uniform may be difficult. In addition to being a basic school requirement, appropriate clothing can contribute to a girl's comfort, confidence and sense of belonging at school.

8.4 Inadequate Parental Care and Support

Inadequate parental care and support was identified as another concern. Girls benefit from encouragement, supervision, emotional support and guidance from parents and caregivers. Where this

support is limited, girls may face additional difficulties in navigating educational and personal challenges.

8.5 Inadequate Toilet Facilities

Inadequate toilet facilities were identified as a school-environment challenge. Safe and appropriate sanitation facilities are necessary for a healthy and supportive learning environment. Inadequate facilities can create discomfort and additional barriers for girls during the school day.

8.6 Lack of Potable Water

Some schools were reported to have inadequate access to potable water. Water is essential for drinking, personal hygiene and sanitation. Limited access can therefore affect the overall quality and safety of the school environment.

8.7 Inadequate Teachers

Concerns regarding inadequate teaching staff were also identified. Where teacher numbers are insufficient, teachers may carry increased workloads and girls may receive less individual attention. Teacher adequacy is therefore an important factor in creating a supportive learning environment.

8.8 Feeding Challenges

Feeding-related challenges were also identified. Adequate food and nutrition are important to the general well-being of girls and their ability to participate effectively in school. For girls living in financially vulnerable households, difficulties with food can create additional pressure around education and daily school participation.

9. INTERCONNECTED NATURE OF THE CHALLENGES

A key lesson from the Pages of Hope project is that the challenges identified are interconnected rather than isolated.

- Household poverty can limit a family's ability to provide educational materials and school uniforms.
- Limited household resources can contribute to feeding challenges and affect a girl's general wellbeing.
- Inadequate school infrastructure, including toilets and water, can affect the quality and comfort of the learning environment.
- Limited parental support can make it more difficult for girls to receive the encouragement and supervision needed to remain engaged in education.
- Inadequate teaching staff can place additional pressure on schools and affect the level of support available to girls.

These interconnected issues demonstrate that improving girls' education requires a holistic approach. Interventions should consider the girl, her school environment and the household support surrounding her, while ensuring that girls remain at the centre of programme design and decision-making.

10. **OUTCOMES OF THE 2026 ENGAGEMENT**

Outcome	Description
Direct reach	Approximately 150 girls were reached across 10 schools.
School coverage	GGI engaged schools across Nyankamam, Tekyikrom, Tekyiman, Yaakasi and Enchi.
Community engagement	Parents were specifically gathered and engaged in Tekyikrom on issues affecting girls' education and well-being.
Needs identification	The project identified key educational, household and school-environment challenges requiring attention.
Programme learning	GGI gained practical insight that can guide future interventions focused on girls.
Foundation for partnerships	The findings provide a basis for developing targeted projects and engaging potential partners and donors.

11. **LESSONS LEARNED**

Girls' experiences must inform interventions.

Direct engagement helps GGI understand the realities that girls experience rather than relying only on assumptions or general statistics.

Education challenges are multidimensional.

Girls' educational experiences are influenced by learning resources, household economic circumstances, parental support, infrastructure, teaching capacity and feeding.

Parents matter.

The Tekyikrom engagement reinforced the importance of parents and caregivers in creating an environment that supports girls' education.

Schools and communities need partnerships.

Many of the challenges identified require cooperation between schools, families, communities, government institutions, civil society organizations and donors.

Documentation is essential.

Systematic documentation of girls reached, challenges identified, activities conducted and outcomes achieved will strengthen GGI's future programme planning and fundraising.

12. **RECOMMENDATIONS**

Priority Area	Recommendation
Educational Materials	Develop targeted support initiatives to provide learning materials to girls who face financial barriers.
School Uniform Support	Explore partnerships that can support girls who lack appropriate or usable school uniforms.
Parental Engagement	Continue engaging parents and caregivers in communities where GGI identifies significant

	barriers to girls' education, using the Tekyikrom experience as a starting point.
Water and Sanitation	Engage relevant stakeholders on schools with inadequate access to potable water and appropriate toilet facilities.
Teaching Capacity	Document concerns about teacher adequacy and communicate them to relevant education authorities and potential partners.
Feeding and Well-being	Explore partnerships and programmes that can respond to feeding-related needs affecting girls' participation and well-being.
Continued School Engagement	Maintain periodic engagement with participating schools to monitor changes and identify emerging challenges.
Girls' Participation	Create safe opportunities for girls to continue expressing their views and contributing to the design of programmes intended to support them.
Evidence and Data	Develop a simple school and girls' needs database to strengthen monitoring, reporting, advocacy and grant applications.

13. **PROPOSED NEXT STEPS FOR GGI**

- Maintain communication with the 10 participating schools.
- Conduct more detailed needs assessments where resources permit.
- Document school-specific needs and prioritize the most urgent areas.
- Develop concept notes and grant proposals around identified needs.
- Identify and approach potential institutional, corporate and development partners.
- Strengthen GGI's monitoring and evaluation system.
- Continue the Pages of Hope project in additional underserved communities as resources permit.
- Create structured opportunities for girls to share their experiences and ideas on education and their future.

14. **CONCLUSION**

The 2026 Pages of Hope: Rural Girls' Education project reaffirmed Girls' Global Initiative's commitment to reaching girls in rural and underserved communities and understanding the realities that shape their educational experiences.

Through visits to 10 schools and direct engagement with approximately 150 girls across Nyankamam, Tekyikrom, Tekyiman, Yaakasi and Enchi, GGI identified a number of challenges affecting girls' education and well-being. These included inadequate educational materials, household poverty, tattered uniforms, inadequate parental care and support, inadequate toilet facilities, lack of potable water, inadequate teachers and feeding-related challenges.

The project also included a specific community engagement in Tekyikrom, where parents were gathered and engaged on issues affecting girls' education and well-being. This reinforced the importance of involving families in efforts to create supportive conditions for girls to remain in school and pursue their aspirations.

The findings demonstrate that supporting girls' education requires attention to the conditions surrounding the girl as well as the classroom itself. GGI therefore intends to build on the lessons from the project through continued school engagement, targeted interventions, advocacy and partnerships.

Every girl deserves not only a place in a classroom, but also the support and opportunity to remain there, learn, thrive and build the future she dreams of.

15. **ANNEX: PROJECT REACH**

Indicator	2026 Result
Project	Pages of Hope: Rural Girls' Education
Reporting period	March 2026

Schools visited	10
Girls reached	Approximately 150
Communities reached through school visits	Nyankamam, Tekyikrom, Tekyiman, Yaakasi and Enchi
Community parent engagement	Tekyikrom only
Core activities	School engagement and community engagement with parents in Tekyikrom
